

Ronaldo Bini Candidate Statement

I am a Latino immigrant living in NYC for 38 years; the Director of Parents in Action for Leadership and Human Rights, an activist organization dedicated to protecting Children from abuses by the Public Schooling System and the Foster Care Industry. I have been active in promoting system change through wherever life may bring me.

I am the founder of the Mental Hygiene Court Patrol, to defend patients from gross Human Rights Violations by Psychiatrists and Mental Institutions.

I am a politically incorrect progressive individual making decisions based on facts, not on beliefs. I oppose forced and unwanted government intervention in the life of individuals and family: I am a Left Libertarian.

I view the world as an organic harmonic continuum where not only every human being deserves full opportunity and respect, but also every living species.

I think that for man to be in harmony with his fellow man, society, and the Universe, he must eventually be vegetarian; thus I encourage progressive people to be fully conscious of the ultimate consequences of their actions and become part of the solution. I oppose the present compulsory public system of "schooling" our Children for 13 years without getting an Education. I reject the present school-as-prison model, and defend Parent's Rights to decide whatever they think is best for their children, including homeschooling.

I oppose using Special Education classes as a mechanism of Social Control where Bright Black and Latino Children are sorted out and coerced/forced under threat or use of CPS, as if being Black or Latino was a Disability.

I consider the Brightest and Bravest, the so-called hyperactive Children, the Natural Elite of the population, and their certain destruction using psychotropic drugs such as Ritalin to be a pre-emptive strike to eliminate them while they are young: they pose the greatest threat to the status quo.

I consider Parents to be the Natural Protectors of their Children, and as such to have a God-given Right to raise them without government intervention. A restoration of Parental Rights Act is needed.

I consider that CPS under any possible excuse illegally kidnaps Black and Latino Children of poor parents in NYC to feed the \$2.5 Billion/year profit-driven Foster Care Industry. 98% of the 17,000 Children in Foster Care in NYC are Black and Latino.

I consider Foster Care not only a racketeering enterprise but a continuation of Slavery: must be part of the Reparations Movement and be abolished. I consider Family Preservation vital for our very survival. Coerced/forced Foster Care and Special Education in Public Schools the main Social Cancer producers that feed the Prison, Homeless, and Mentally populations. As such we all have a duty to

promote Social Healing initiatives that contribute to the Common Good. I encourage people to start thinking out-of-the-box and Defend the right of Poor Families to raise their Children. I am Solution-oriented and my main contribution will be to find common ground to make WBAI the one with the Highest Audience.
